# Samsung bd-j5100 region unlock

© 1996-2014, Amazon.com, Inc. or its affiliates Thread Hello there, I have a very simple Question. As ist seems I can `t change the Region codes for Blu-Rays anymore. I already had this Problem and I remeber that I had to empty the Cache somehow but I can `t remember how to this. I thought it was hitting "stop" multiple times, but it doesn `t work. Maybe someone here had the same issue and can help me.. was your player region free before ?? have you recently updated the players firmware ?? Yes, it was region free before. Just had to change the code on the remote. No update . Help us keep the list up to date and Submit new DVD and Blu-ray Players here. This list is based from user reports and we have not verified or tested any region codes. Use them at your own risk. What are Blu-ray and DVD region codes, country codes, multi-region or zone locks? Read DVD Player region codes and Blu-ray region codes. This worked for me first try on a Mexican bought BD F5500, after no results with any of the protocols posted previously.Region code hack posted by keychain, November 22 2013:This is for the Samsung BD-F5500 3D Blu Ray.The hack posted by BillKG worked for me, exactly as posted by him. I live in South Asia, region code 53814.Specifically, follow rtalaman's protocol, except, don't press the A-B button, but press the blank button to the right of the A-B button. This worked on the second try for me. Make sure to sit close to the DVD player. If you're sitting at a normal distance, the player may miss sensing a push of the button on the remote, in which case it may not work. Worked perfect just in 2 tries. As someone says sit close to the DVD player so that it gets all the digits. And yes instead of repeat use the black button in the very last row of buttons on the remote. This black button is between A-B and Screen buttons. Worked like a charm. Remember to do a power recycle after pressing the last 9 and trying out other region disc.
